The game is set in a giant, completely virtual world called the Ocean. The game is based on the multiple awards winning ocean simulator, Ship Simulator World. In Sailaway - The Sailing Simulator you'll take control of a sailboat and explore the ocean. There are no targets, goals, quests, sea monsters, . Sailaway - The Sailing Simulator features accurately modeled waves and water color based on your location (waves and wave behavior differs from ocean to ocean), and day and night skies. It's a nice game but it is still the same Ship Simulator World that was released in 2012. It was a fantastic game, and still is a fantastic game but there is not enough new features and improvements in this game to make it stand out from other games of the genre. Especially the online multiplayer wasn't good. So, if you want a great ocean simulator you should play Ship Simulator World, as this game is now too old and outdated. Line 3: Undefined variable: jquery Line 6: Syntax error, unrecognized expression: #dataList The first line refers to the following: And the second refers to: I tried to see if this has anything to do with #dataList being undefined by adding an alert in the function, but I get the error on the first line of code, not the alert. Is there something that I'm missing here? I'm not even sure how to begin, and I've been searching for 3 hours and have found nothing useful. I really hope someone can help me out.
