What's New in the Arlington HTML2EXE Wizard?

A fast, powerful and easy way to create or convert your HTML pages into standalone apps. HTML2EXE uses compression and other tricks to reduce the size of the EXE file to an absolute minimum. You can put all your HTML and images into a single "HTML2EXE wizard" and have all your contents compiled and ready in under 10 minutes. After you have created your HTML2EXE wizard you are ready to distribute your app. You can distribute it by CD, floppy or e-mail, to as many users as you like. When your HTML2EXE wizard is created you can set it to run automatically when a user inserts a CD or a floppy disk into their computer. Alternatively you can create a Autorun file that can be used with CD distribution. Alternatively you can create a short cut on your clients PC that when clicked automatically executes your wizard. As you might have guessed from the name of the program, HTML2EXE is a simple program that will convert your html pages into EXEs. It supports a number of options for creating your EXE including the ability to set what file names to convert. This feature is useful if you have multiple html pages and you want each page to have a different name. You can also specify whether or not you want the EXE to start automatically when it is run or whether you want it to auto run when a user inserts a CD or floppy disk. HTML2EXE also supports password protection to help prevent

people copying your contents. When you first start the program you are asked to enter a password that will be required in order to run the program. You can set what file names will be converted by the program (these are the file names that will be contained within your e-book) and you can also specify the original file name of each file. You can also set a title for each file that will appear in the caption bar of your clients Custom Browser. You can even specify your own icons to appear on the toolbar and then you are ready to convert your pages! HTML2EXE is available for a limited trial period. After that time the program will automatically stop running without allowing you to convert any more pages. No registration is required to use the trial version of the program. When you finish using the program you can purchase a registration which allows you to convert as many pages as you wish for another \$19.95.Q: How to get the index of a dataframe in a list

System Requirements:

Windows XP SP2 Windows 7 SP1, SP2 Minimum 1024 x 768 screen resolution Minimum 512 Megs of RAM Java Runtime Environment (JRE) version 6 Update 19 or later If you are not on a Windows machine, you can run Linux or Mac OS X and use the emulator. Setup Details: You will need a system with a screen resolution of 1024x768. You will be asked if you'd like to use the emulator on your Mac or Windows machine. Answer with a Y if you are on
