We need your help!

We need developers, indie-developers, editors, testers and documentation writers. Even members of the development team don't have the time to work on the game, but we really want to add new features and improve the gameplay.

Timeline

The developers are completing a prototype, but they're far from having a finished game. The content must be created and polished before we can release the full version.

How much are we asking for?

It's a work in progress. We want to raise the funds for our first release, but the game has an estimated budget and we have a few things that we want to add. So, each supporter can decide how much they'd like to contribute.

Money from this campaign will support the following things:

1. Initial release (August 2017)
2. Addition of new elements
3. Technical support
4. Game and content localization
5. Online updates

****Good times*** ZEscape is an apocalyptic multiplayer arena where you fight for survival as a zombie-racing Survivor. On your journey, you'll find a variety of weapons and techniques to annihilate and outrun your enemies, either with your team, or solo. ****Realistic and Unrealistic*** Each level you'll encounter in the game is out of this world, with a variety of obstacles and foes to overcome. With the various game modes, both friendly and adversarial, you'll be able to enjoy the fast pace, varied level designs, and high replayability that make ZEscape one of the most exciting zombie games to date. ****Game Modes*** There are two basic game modes in ZEscape: -Survival: Survive as long as you can! The winning team is the one that has the highest number of players alive at the end of the game. -Timed Runs: Mix up the zombie craze by participating in timed runs. Compete with your friends and see who can finish in the lowest amount of time. -Field Goals: This mode consists of a game field that gets progressively smaller during the game. The only way to win is to avoid all of your opponents at any point on the track. -Bosses: Get the thrill of fighting some of the biggest bosses in the game! Some bosses will take the combined assaults of the entire map to defeat. Others will be easier to destroy, but can take up to 5 whole runs of the map to defeat. -BOSS BATTLES: The arena is your oyster! During boss battles, the streets and rooftops become your own battleground. With limited weaponry, you'll have to strategize carefully in order to protect your teammates while getting the most amount of kills before being beheaded. ****Weaponry*** On the battlefield, you'll have a variety of weaponry to use depending on your current health status, gear, and abilities. -Rocket Launcher: Uses rockets to attack, but is rather accurate and can be quite powerful -Flamethrower: Uses fire to attack, but can spread very quickly -Scarecrow: A range or melee option, and can nullify enemies for a short period of time -Energy Arm: Can be thrown to temporarily heal a team member -Sniper: Similar to the energy arm, this arm can be thrown, but cannot
